Professional Summary

Aspiring Software Engineer & Full-Stack Developer skilled in Python, JavaScript, React, and SQL. Hands-on experience in developing responsive applications, API integration. Delivering real-world solutions in debugging, deployment, and predictive modelling. Passionate about solving problems and delivering user-focused IT solutions.

Technical Skills

Languages: Python, JavaScript, SQL
Frameworks: React, Bootstrap, HTML, CSS
Tools: Git, GitHub, VS Code, Vercel
Other: Cybersecurity fundamentals, API integration

Projects

Weather App (JavaScript, Open Weather API): Built a real-time weather application with dynamic updates and responsive UI.

Language Translator (Python, Google Translate API): Developed a multilingual text translator supporting 30+ languages.

Netflix & Airbnb UI Clone (HTML, CSS, Bootstrap & JavaScript): Designed responsive web UIs with cross-device compatibility.

Internship Experience

Data Science Intern (6 Months):
• Performed statistical analysis, regression modelling, and visualization.
• Built ML models that improved prediction accuracy on real datasets.

Python Programming Intern (4 Weeks):
• Developed Python applications with debugging and deployment.
• Applied coding best practices in team projects.

Education

Visakha Institute of Engineering and Technology, Visakhapatnam
B.Tech in Electronics & Communication Engineering (2021–2025) | CGPA: 7.21/10

Sri Satya Sai Junior College, Bobbili
Intermediate Education (2019–2021) | Percentage: 73.3%

Certifications

• Data Visualization – Tata Consultancy Services (TCS iON)
• Cybersecurity Fundamentals – MasterCard
